

It's Easy to Connect to CirrusDx

EMR integration

CirrusDx is able to integrate with most EMR interfaces for seamless test ordering (including home collection kits) and results reporting. This reduces manual entry and transcription errors. Timelines vary by system.

CirrusDx web portal

For practices without EMR integration, our secure web portal offers:

Electronic Order Entry – Place lab or home collection orders, store patient/billing info, and access past results.

Results Reporting – View, save, or print results anytime.

Setup is quick and includes user training.

CirrusDx patient portal

Patients can securely view their lab results online for timely access to important health information.
